Office Action Summary

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 9 and 19 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Eden et al (4,874,628, column 6, lines 45-50 and column 8, lines 50-65).

Eden et al discloses a composition including water, a confectionery ingredient and sago starch having a water fluidity (WF) from 10-75.

4. Claims 10-15 and 20-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eden et al.

Since the sago starch in Eden et al has the same physical characteristics as applicant's starch, Eden et al's sago starch will obviously have the same gel strength claimed by applicant.

5. Claims 16, 17, 26 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eden et al in view of Jeffcoat et al, Park or Yuan.

It would have been obvious to use the sago starch in Eden et al as a thickener for yogurt since it is conventional to thicken yogurt with starch, as evidenced by Jeffcoat (column 4, lines 23-33) or Park (column 2, lines 12-21), or since it is old to use starch in a fat replacer composition for yogurt, as evidenced by Yuan (column 2, lines 36-50).

6. The disclosure is objected to because of the following informalities: The updated status of the parent application has been omitted from the amendment to page 1 of specification.

Appropriate correction is required.

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

8. Claims 19-27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 19-27 are indefinite in failing to recite to what the sago starch is added. Correction is required without new matter.

9. Any inquiry concerning this communication from the examiner should be directed to Arthur L. Corbin whose telephone number is (571) 272-1399. The examiner can generally be reached on Monday--Friday from 10:30 to 8:00 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Milton Cano can be reached on (571) 272-1398. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
